Global Kinetics Corporation

Recognized as a Top 10 Most Innovative Health Company by the Fast Company Awards 2017, Global Kinetics (GK) is a privately held technology company focused on revolutionizing the treatment of Parkinson's disease by providing a market leading innovative digital health technology.

The company was formed in 2007 to commercialise its lead product, the Personal KinetiGraph® (PKG®), also known as the Parkinson's KinetiGraph® outside the USA. Developed in conjunction with the world-renowned Florey Institute of Neuroscience & Mental Health in Melbourne, Australia, the Personal KinetiGraph® enables the precise monitoring, quantification and reporting of movement symptoms in Parkinson's. To date, Global Kinetics has supported clinical decisions for doctors who treat patients with Parkinson's disease across 17 countries with more than 3,000,000 hours of clinical data from our FDA-cleared, CE-marked PKG® wearable device. Global Kinetics, a privately held company, is headquartered in Melbourne, Australia with offices in London UK, Minneapolis and Portsmouth, NH USA.

GKC's major publicly disclosed investors are Brandon Capital, Bioscience Managers and OurCrowd. Other investors include sophisticated institutional investors, high net worth individuals and staff. GKC has recently achieved third close of a Series 6 capital raise and is in the process of finalising the round. One further funding round will be required to achieve "break even".

Over 200 clinics are using the service in Australia, Asia, Europe (including Sweden, UK, Germany and the Netherlands), and the USA.

About Parkinson's Disease

There is a broad range of movement disorders, with Parkinson's Disease being the most prevalent. Globally, there are over 6 million people who have Parkinson's Disease. 10% of people who are diagnosed with Parkinson's Disease are younger than 50 years.

Parkinson's disease is a progressive disorder of the brain's frontal lobe, which controls impulsive and non-impulsive movement. The main motor (or movement) related symptoms of Parkinson's disease are bradykinesia, rigidity, tremors, postural instability and over time people with Parkinson's may experience dyskinesia or relentless uncontrolled movements. Other non-movement symptoms may be experienced such as speech and swallowing difficulties, cognitive impairment or behavioural change and sleep disturbance.

The most common treatment for Parkinson's disease, levodopa, aims to increase the amount of dopamine in the brain. Treatment doesn't cure the disease but can improve symptoms to enable people with Parkinson's Disease to live independently and enjoy a better quality of life. Parkinson's Disease is a challenging illness and each person may experience different symptoms with varying severity.

Other Movement Disorders include Parkinsonian Tremor, Restless Legs Syndrome, Dystonia, Huntington's disease or Wilson's Disease.

Studies

GKC has been featured in a variety of published papers including:

- Griffiths R, Kotschet K. Automated Assessment of Bradykinesia and Dyskinesia in Parkinson's Disease. *Journal of Parkinson's Disease* 2 (2012) 47–55.

Position description: VP Finance

Reporting to the CEO, this key role will be responsible for the financial operations of the company on a global scale.

Key Accountabilities:

- Oversee the financial, cash flow and accounting functions of the organisation including the efficient and accurate measurement of the financial performance of GKC globally (AU, EU, USA, China);
- Participate in capital raising activities from time to time to ensure that the organisation has sufficient working capital to meet its strategic objectives;
- Oversee excellent internal controls that comply with statutory, internal, tax and other compliance requirements;
- Manage the Company's share and options registers and assist with the preparation of related documents;
- Oversee compliance with regulatory requirements, statutory obligations and accounting standards. This includes provision of timely and accurate reports as required by ASIC and the ATO;
- Provide operational financial management information and support to the CEO, Board, leadership team and staff to assist them in decision making and to enable optimal performance of their respective roles;
- Oversee and prepare detailed financial budgets for the organisation;
- Oversee the preparation of detailed monthly financial reports for provision to the Board and leadership team, including analysis against approved budgets;
- As a key member of the GKC leadership team, work with business managers to identify, develop and assess the financial implications of major plans, decisions and strategies;
- Develop the finance team to be able to provide high quality financial analysis and assessments in the development and implementation of short, medium and long-term business plans;
- Plan and manage tax issues, both domestic and international, to minimise tax expense whilst ensuring compliance with all taxing authorities; and
- Manage external relationships, including audit/accounting, tax and banking.

Qualifications and skills

- Bachelors' degree in Accounting, finance or related field (MBA preferred);
- Professional accounting qualification (CA or CPA);
- 10 + years' experience in a senior financial management position;
- Strong knowledge of statutory, legal, accounting and taxation requirements across multiple jurisdictions;
- Experience in life science, medical device or related field;
- Experience working in a fast-paced, dynamic, growing organisation;
- Exceptional people management and interpersonal skills with the ability to interact with senior business leaders and the Board;
- Inclusive leadership style;
- Excellent analytical and evaluative skills;
- Results oriented, strategic thinker and planner;
- Advanced computer skills, including high proficiency in MS Office and financial reporting software.
